whenever operational need exists.

5. Statement emphasizing importance of and mutual interest in assuring safety of flight.

6. Complaint re Soviet failure co-operate in established procedures to assure safety of flight in this instance; specifically :

(a) Rejection of Soviet controller's contention all altitudes above 10,000 feet ^{are} used by Soviet aircraft as patently absurd;

(b) Reminder that since aircraft ^{to safety} flying under visual flight rules only danger/^{to safety} of flight arose as result of deliberate harassment of C-130 by Soviet aircraft, about which protest already made.

7. Re Soviet controller's mention of need for agreement for flights above 10,000 feet, US controller might make comment orally when delivering written protest that adequate agreement re rules of flight in corridors and control zone (DAIR P(45) 71 - Second Revise) already exists and that this agreement does not establish upper limit for corridor flights.
